

Paul Hepperly

**Research Director
Rodale Institute**

Paul Reed Hepperly holds a doctorate in plant pathology, a master's degree in agronomy and a bachelor of arts degree in psychology from the University of Illinois. He has worked with farmers from regions around the world, including Central and South America, the Caribbean, India and Africa. He has extensive expertise in organic and conventional agriculture and has contributed to more than 150 publications on topics such as plant pathology, fungal diseases, plant disease resistance, disease management, epidemiology, diagnosis, fungal ecology, seed pathology, agronomy, horticulture, weed management, carbon sequestration and research program management. In September of 2007, Hepperly was honored as a recipient of a Fulbright Scholar Award. In 2005, he received the Rachel Carson Council's Sense of Science award in Silver Springs, Maryland, and in 2004 he was awarded the Da Vinci in the Community award from the Da Vinci Discovery Center of Science and Technology in Allentown, Pennsylvania.
